Summary

As a Software Engineer with a background in Front-end Web Development, I have gained a deep understanding of various design frameworks, databases, and technologies, particularly in React and NextJs. My passion for coding and creativity is reflected in my ability to collaborate with cross-functional teams to develop intuitive and engaging user interfaces.

I am actively seeking opportunities to enhance my skills and technical abilities. I am confident that my passion for web development and my ability to solve complex problems would make me a valuable asset to your team.

Skills

Languages: JavaScript, Typescript, Python, PHP, Ruby, HTML, CSS, Swift, Bash, Java, Kotlin, C.
Frameworks, Libraries, and Environments: NodeJS, NextJS, ReactJS, React Router, AWS, Bootstrap, Pandas, Numpy, JQuery, Redux, Gatsby, Material UI, SASS, GSAP, Tailwind, Strapi, Docker
Systems and Databases: Linux, SQL, MongoDB, Git, Firebase, NoSQL.

Employment

Front-end web developer, ITcomplements   **August 2021 – present, Mexico City, MX**
- I spearheaded the design and development of a new system version. Utilizing **Figma**, I designed the prototype before translating it into a functional reality using **React, Javascript, and Antd**. My primary focus was on elevating the **user interface to optimize user experience**. Collaborating seamlessly with the backend team, I successfully coded the new version of the system in React, ensuring seamless integration with the backend.
- The new system version is slated to be adopted by the government of Nuevo Leon, Mexico, specifically in health clinics. This project is set to address long-standing issues that clients have sought to resolve for the past five years, promising a significant enhancement in operational efficiency and user satisfaction. As a testament to its potential, several other clients are anticipated to migrate to this advanced version soon, further validating its transformative impact on the industry.
- Contributed significantly as a key member of a developer team, actively addressing diverse project requirements in Jira across multiple projects, demonstrating adaptability and proficiency in resolving both new developments and long-standing UI design needs. Collaborated effectively with peer developers, clients, and project managers to ensure successful project outcomes.

Full-stack developer, Americas Paper World   **July 2023 – August 2023, Mexico City, MX**
Designed and implemented a Full-stack event registration web page using **PostgreSQL, Strapi, React, and Tailwind**. The page includes essential features such as a landing page, registration form, and dynamic map, facilitating the company in launching the application for inviting global companies to the Americas Paper World Exposition.

Projects

AWP Exhibition (July 2023**)**
Landing page for a global exposition, allowing users to register and Strapi CMS.
Technology: NextJs, Tailwind, HTML, Typescript, CSS, MUI.

Teddies Vs Monsters (June - July 2023)
An e-commerce NextJs website developed by collaborating with a cross-functional team.
Technology: NextJs, Typescript, Tailwind, Strapi, Shopify, PostgreSQL, Stripe.

NextJs portfolio web page (August 2023)
Technology: NextJs, Tailwind, HTML, Typescript, CSS.

Education

Web Application Development Diploma Cornerstone International Community College, (Vancouver BC, August 2022 - present)

Bachelor in Computer Systems Engineering Tecnologico de Monterrey, (Mexico City, July 2022)

PCEP - Certified Entry-Level Python Programmer Python Institute (October 202)

CAPM - Certified Associate in Project Management PMI - Project Management Institute   (August 2021)
